How long do hyaluronic acid fillers last?

Hyaluronic acid fillers tend to be the most temporary option, and therefore are often recommended for first-time filler patients. These will typically last from **6 to 18 months**. Injections to the lips will wear out a little faster than those to the nasolabial folds.

New concept of firming and lifting

If you want to appear more youthful-looking — without appearing like you've had work done — then chances are Sculptra Aesthetic may be a good choice for you
